September 28, 2021

GeaCom, Inc. is recipient of a grant to support export activities focused on Canada. The U.S. Commercial Service, with offices in Minnesota, works to incentivize export from Minnesota businesses. The goal of the Commercial service is to ultimately improve the Nation's trade economics. This grant supports trade missions in British Columbia, Ottawa and Toronto; areas with acute need for GeaCom's products.

GeaCom's Phrazer/Kitsune products are designed in Minnesota, produced in Minnesota and supported from Minnesota; qualifying them for Commercial Service support. GeaCom's solutions are proven to be of special value to National Healthcare Systems such as Canada's. GeaCom has opened an office in British Columbia and owns a subsidiary, qualified and registered as a Canadian entity. The initial success in British Columbia has staged the Company for a national export strategy.

The U.S. Commercial Service has been assisting GeaCom for several years and beyond this special grant has been advising on strategy while providing ongoing support. The Canadian market, not only being close, is one with special immigration and geographic challenges that have special need for the solutions available from GeaCom. With the new concerns of COVID and variants, GeaCom is well positioned to make rapid progress in 2022 as the result of the grant support.

About GeaCom

GeaCom is a leading global healthcare engagement solutions provider, with its patented systems deployed in hospitals, community clinics, and educational environments. Its systems are developed in the US, and compliant with healthcare regulatory approval and data privacy standards in the countries deployed. The Company's service teams and its partners provide equitable and effective health engagements across all demographics, resulting in improved patient experiences and positive outcomes and productivity improvements for healthcare providers. To date, GeaCom's solutions have provided over 40,000,000 engagements in hundreds of languages, across 5 continents, as we lead the relentless pursuit of equitable excellence in vital services.
