

Increasingly Efficient Staff Members

Phrazers empowers staff to work at the top of their licensure, by taking away some of the more mundane tasks. Their increased efficiency and productivity allows staff more “Back to the Bedside” time for improved Patient Engagement.

- Phrazer helps patients stay focused and engaged while gathering their pre-operative information
- Staff stays informed, via Caregiver Audio stream, while free to multitask more easily
- Phrazer populates your EMR’s doc flowsheets with patient-generated information
- Leaders appreciate their staff’s reduced incidental overtime

Patients Appreciate Phrazer

Pre-operative patients often feel vulnerable and fearful. Phrazer engages them and gains their trust quickly, allowing them to comfortably offer the details medical staff needs to know before the procedure.

- Phrazer offers patients a private interaction via the Patient Audio stream
- Patients feel more secure and are more willing to honestly answer “tough questions” when interacting with Phrazer
- Patients benefit from having providers who are practicing at the top of their scope

Patients are put at ease before their procedure, thanks to their meaningful interactions with Phrazer and their providers’ ability to get back to their bedsides.

Saving You Time and Money
