

The Power to Treat
Anyone... Anywhere...

Phrazer - The World's First Multilingual Medical Caregiver/Patient Interface System

Geacom's introduction of Phrazer dramatically changes the way patients and caregivers communicate. Phrazer's use of CITE technology, patented multi-stream audio and culturally relevant on-screen caregivers will dramatically improve the quality of your patients' care and efficiency of your system.

System Overview

- FDA and HIPAA compliant, U.S.A. - made medical grade communication device
- Phrazer communicates with any patient regardless of language, literacy, culture, gender, or background
- Over 24 hours of continuous battery life per charge from one set of hot swappable batteries
- 99.98% antimicrobial and intrinsically safe; Phrazer can be soaked in cleaning solution
- From patient to chart, Phrazer instantly inserts patient data into the correct fields of your EMR System
- Realtime audio updates provide the caregiver with timely, critical patient information
- Patient's interact with a culturally relevant, comforting caregiver
